

WHY MANUFACTURERS NEED CYBERSECURITY

THAT'S HOW MANY MANUFACTURERS SAY THEY DON'T HAVE A FORMAL CYBERSECURITY PLAN. HERE'S WHY THAT STATISTIC **SHOULD ALARM YOU**

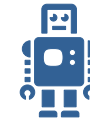

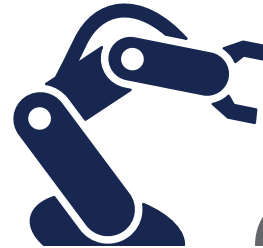

YOU MAY BE HOSTING A HACKER ALREADY

010
1001
110

YOUR IP MAY ALREADY BE UP **FOR SALE**

Intellectual property can be big money for hackers. Many will steal IP from manufacturers and sell it in foreign markets without the manufacturer even knowing it's been stolen.

MANY MANUFACTURERS USE OUTDATED TECHNOLOGY

Legacy computer systems such as Windows XP or Server 2003 are common with manufacturers, but they are also no longer supported with security patches.

THIS MAKES THEM PRIME TARGETS FOR HACKERS!

YOU COULD BE A SPAMMER

Sometimes, all hackers want is your server and internet connection so they can send spam and phishing emails out from a legitimate address. When traced back, it looks like it came from you.

HOW CAN YOU PROTECT YOUR BUSINESS?

Develop a risk-based approach that identifies the areas of most concern for your unique business. **Want help? Contact us today.**
